DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 2, 3 and 13, drawn to valve structures.

Group 2, claim(s) 4 and 5, drawn to a valve control system.

Group 3, claim(s) 6, 7, 9 and 10, drawn to a gearing transmission.

Group 4, claim(s) 8, 11 and 12, drawn to shock absorbers.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: none of the claims include any limitations in common except for those in independent claim 1, from which all other claims directly or indirectly depend. However, the limitations of claim 1 are not novel and therefore cannot form the basis of a special technical feature as required for unity of invention. The limitations of claim 1, drawn to a wave energy-powered air compressor, are taught by the reference FR 2476759 cited by the applicant.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 3746

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
